1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.
2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Engines, gas, n.o.p. and parts", which show both quantities and values. In the item "Engines, gas, n.o.p. and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.
6. Under the main provisions of the law, the value of merchandise imported into Canada is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to Canada; but the value shall not be less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (See Sections 35 to 45 of the Customs Act.)
7. For Customs entry purposes, the value of the imports, which is in the currency of the country from which goods are imported, is converted to Canadian dollars at authorized exchange ratios. (See Section 55 of the Customs Act and Orders in Council respecting currency valuations.)
8. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.
9. The initials "N.O.P." mean "not otherwise provided for".
10. Some of the descriptions of articles used in this report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.
11. Throughout this report, figures are subject to revision.

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.

2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Engines, gas, n.o.p. and parts", which show both quantities and values. In the item "Engines, gas, n.o.p. and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. Under the main provisions of the law, the value of merchandise imported into Canada is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to Canada; but the value shall not be less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (See Sections 35 to 45 of the Customs Act.)

7. For Customs entry purposes, the value of the imports, which is in the currency of the country from which goods are imported, is converted to Canadian dollars at authorized exchange ratios. (See Section 55 of the Customs Act and Orders in Council respecting currency valuations.)

8. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

9. The initials "N.O.P." mean "not otherwise provided for".

10. Some of the descriptions of articles used in this report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.

11. Throughout this report, figures are subject to revision.

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.

2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Engines, gas, n.o.p. and parts", which show both quantities and values. In the item "Engines, gas, n.o.p. and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. Under the main provisions of the law, the value of merchandise imported into Canada is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to Canada; but the value shall not be less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (See Sections 35 to 45 of the Customs Act.)

7. For Customs entry purposes, the value of the imports, which is in the currency of the country from which goods are imported, is converted to Canadian dollars at authorized exchange ratios. (See Section 55 of the Customs Act and Orders in Council respecting currency valuations.)

8. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

9. The initials "N.O.P." mean "not otherwise provided for".

10. Some of the descriptions of articles used in this report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.

11. Throughout this report, figures are subject to revision.

1. In all the tables of imports in this Report, the quantities and values are based upon the declarations of importers (import entries), as subsequently checked by Customs officials.

2. Weight, where shown is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs Tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Engines, gas, n.o.p. and parts", which show both quantities and values. In the item "Engines, gas, n.o.p. and parts", the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. Under the main provisions of the law, the value of merchandise imported into Canada is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to Canada; but the value shall not be less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (See Sections 35 to 45 of the Customs Act.)

7. For Customs entry purposes, the value of the imports, which is in the currency of the country from which goods are imported, is converted to Canadian dollars at authorized exchange ratios. (See Section 55 of the Customs Act and Orders in Council respecting currency valuations.)

8. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

9. The initials "N.O.P." mean "not otherwise provided for".

10. Some of the descriptions of articles used in this report are abbreviated and incomplete due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed report of the Trade of Canada.

11. Throughout this report, figures are subject to revision.
